

PERSONAL EXPLANATION

HON. RANDY NEUGEBAUER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 15, 2009

Mr. NEUGEBAUER. Madam Speaker, I was absent from votes on July 13, 2009 due to a flight delay. Had I been present, I would have voted "nay" on rollcall No. 530.

EARMARK DECLARATION

HON. ANH "JOSEPH" CAO

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 15, 2009

Mr. CAO. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 2892—the Department of Homeland Security Appropriations Act, 2010:

As requested by me, Rep. ANH "JOSEPH" CAO, H.R. 2892—the Department of Homeland Security Appropriations Act, 2010, provides for the City of New Orleans Emergency Medical Services ("EMS"), New Orleans, LA in support of an Emergency Operations Center. This is in the FEMA—State and Local Programs—Emergency Operations Center Account in the amount of \$750,000. This will benefit the City of New Orleans, 1300 Perdido Street, Suite 4W07, New Orleans, LA 70112 in the form of upgrades and retrofitting of a new permanent Emergency Operations Center for the city's sole 9–1–1 emergency medical service provider. This funding will help secure and store equipment and medication, and provide a training center and base of operations for the emergency medical services. Currently, Emergency Medical Services are operating from a pairing of FEMA trailers staged underneath the Crescent City Connection overpass. Moving to the new facility on City Park Avenue and making the proposed changes to the facility will provide for the critical operational needs. Having a secure medication and equipment storage area, training areas, and a protected emergency operations center will help the department serve the citizens of New Orleans and better secure the city.

EARMARK DECLARATION

HON. MICHAEL K. SIMPSON

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 15, 2009

Mr. SIMPSON. Madam Speaker, in accordance with the policies and standards put forth by the House Appropriations Committee and the GOP Leadership, I would like to place in the RECORD a listing of the congressionally-directed projects I have requested in my home state of Idaho that are contained in the report of HR 3183, the FY2010 Energy and Water Development Appropriations Bill.

Project Name: City of Boise Geothermal Expansion to Boise State University
Amount Received: \$1,000,000
Account: DOE Energy Efficiency and Renewable Energy Geothermal Technology

Recipient: City of Boise

Recipient's Street Address: 150 N Capitol Boulevard, Third Floor, Boise, Idaho 83702
Description: The Boise City geothermal system currently provides a low cost, environmentally sound, sustainable, locally provided heat source to commercial and publicly owned buildings in downtown Boise. Geothermal heat is considered a renewable source of energy and does not rely on fossil fuels, nuclear power, mining or damming of rivers and emits zero emissions into the atmosphere. This project will extend the City of Boise geothermal pipeline system to Boise State University and would have the capacity to heat almost two million square feet on the campus. As global energy costs increase, the expansion to increased facilities will provide significant cost savings.

Project Name: Idaho Accelerator Center Production of Medical Isotopes
Amount Received: \$1,500,000
Account: DOE Office of Science
Recipient: Idaho State University
Recipient's Street Address: 921 South 8th Avenue, Pocatello, ID 83209

Description: The National Academy of Sciences recently issued a report recommending that the federal government increase support to radionuclide production, distribution and basic research in production mechanisms; increase the domestic production of medical radionuclides through dedicated accelerators and reactors; and educate the next generation of medically-related nuclear scientists. The Idaho Accelerator Center (IAC) will develop a medical isotope production facility that will serve regional isotope needs, conduct basic research in isotope production, educate the next generation of medically-related nuclear scientists, and partner with regional and national entities in medical isotope distribution and use. This program will meet regional and national needs in education and isotope production and provide new isotopes that are not currently part of the national isotope portfolio. IAC will complement, supplement and enhance DOE's National Isotope Program.

Project Name: Idaho National Laboratory Center for Advanced Energy Studies (CAES)
Amount Received: \$1,000,000
Account: DOE Office of Science
Recipient: Idaho National Laboratory
Recipient's Street Address: 2525 North Freemont St., Idaho Falls, Idaho 83415

Description: CAES is a partnership between the State of Idaho and its academic research institutions, the federal government through the U.S. Department of Energy and the Idaho National Laboratory managed by the Battelle Energy Alliance, LLC. Through its collaborative structure, CAES combines the efforts of these institutions to provide timely energy research on both technical and policy issues. The funds provided will procure world-class computation and visualization research equipment to be located in the CAES research laboratory. These research tools will enable both critical-path scientific research and graduate education programs focused on such twenty-first century energy challenges as the availability of carbon-neutral renewable energy, such as biofuels for transportation; the stewardship of the environment including water resource management through energy efficiency; the management of fossil fuel energy systems; and the expansion of energy production from commercial nuclear power while edu-

cating the next generation of scientists, engineers, policy makers and the public.

Project Name: Little Wood River Ecosystem Restoration
Amount Received: \$100,000
Account: Corps of Engineers
Recipient: City of Gooding, Idaho
Recipient's Street Address: 308 5th Ave. West, Gooding, ID 83330

Description: This funding was authorized in the Water Resources Development Act of 2007 and would be used to repair and replace an aging WPA/CCC project that channeled the Little Wood River through the City of Gooding, Idaho. The project will remove and replace the existing rock wall and the boxed culverts that severely restrict the stream channel flow. Approximately 1.5 miles of the Little Wood River flow within Gooding city limits. Over the years, aging along with high water and ice jam events have caused severe deterioration of the masonry rock walls constructed in the 1930s and 40s in order to protect the city from floods. Large portions of the existing lava rock walls that line the Little Wood River through the city are structurally unserviceable and many have failed and fallen into the channel. This deterioration has increased at an alarming rate. The Corps of Engineers and the City of Gooding have been working on a solution for this rock wall failure for the past 20 years. The Army Corps has completed the Reconnaissance Study and the General Investigation Study, but the project has been on hold due to a lack of funding.

Project Name: Rural Idaho Section 595
Amount Received: \$5,000,000
Account: Corps of Engineers
Recipient: Walla Walla District Corps of Engineers
Recipient's Street Address: Boise Field Office, 304 8th St., Rm. 140, Boise, ID 83702–5802

Description: The funding was authorized in the Water Resources Development Act of 2007. This funding is critical to assisting rural Idaho communities in upgrading their water and wastewater treatment facilities. In many cases, this funding is required to comply with unfunded mandates passed down by this Congress and federal agencies. In addition, these funds help rural communities in Idaho trying to attract new businesses and spur economic development. The vital water funding in this bill will assist rural communities in job creation and affordable housing by offering improved services at lower costs than would otherwise be possible. This request is consistent with the intended purpose of this account. Funding will be directed primarily to the Eastern Idaho Regional Wastewater Authority in Shelley, Idaho.

I appreciate the opportunity to provide a list of Congressionally-directed projects in the report accompanying the FY2010 Energy and Water Development Appropriations bill on behalf of Idaho and provide an explanation of my support for them.

EARMARK DECLARATION

HON. GREG WALDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 15, 2009

Mr. WALDEN. Madam Speaker, consistent with the House Republican Leadership's policy
